

Senior Industrial Designer at Layer

London, United Kingdom

Layer, an experience driven design agency is seeking an industrial designer with a minimum of 8 years industry experience to join their growing London studio.

LAYER, delivers experience-driven design for both the physical and digital worlds. Led by Benjamin Hubert and a growing creative team, LAYER is partnering with forward-thinking brands – including Nike, Samsung, Braun, BMW, Fritz Hansen, and Herman Miller – to create products that will help define the way we live, work and communicate in the future, from smart wearables and furniture systems, to the next generation of media and communication devices.

Our experience driven approach to projects requires a diverse range of skills, the successful applicant(s) will be a proactive person with a positive attitude to become an integral team member.

Fluency in English is a prerequisite – other languages beneficial.

Duties and responsibilities:

- Strategic direction
- Ability to own projects, client relationships, accounts, and fiscal responsibilities, while also driving sales.
- Strong administrative, team management and client facing skills
- Project management tasks including project scoping, leading multi-disciplinary teams, and managing schedule and budget
- Strategic thinker and able to work across a number of sectors
- Concept generation; Good sketching and communication abilities
- Design development; 2D (Illustrator, Photoshop, InDesign),
- Design development ; 3D (3D modeling and rendering)
- Design for production; Good knowledge of production processes and materials
- Exceptional industry and historic knowledge of design
- The candidate should be efficient with their time and be prepared to join an extremely fast-paced environment
- Adept at collaborating with different perspectives and skill-sets, the ability to forge and nurture connections is paramount.
- Remote and in-person client presentations, with occasional travel
